

4X faster upgrades to Databricks **Unity Catalog** with **Unity Catalog Migration Accelerator**

Fully automated workload migration to Databricks Lakehouse with **Impetus LeapLogic**

Build a Databricks Lakehouse in less than three weeks with **Impetus Data Platform Accelerator**

Develop **GenAI applications** at scale with **DBRX**

What we do

Innovate with Enterprise AI Services

Unify & optimize with Data Engineering Services

Migrate & modernize with Cloud Engineering Services

Next-gen IT services and solutions for Databricks

Application modernization

- Cloud migration and maturity assessment
- Microservices and containerization
- Native and cross-platform mobile applications
- UI/UX

Architecture consulting

- Technology evaluation and benchmarking
- Scalable, elastic architectures
- Architectural audits
- Hybrid and multi-cloud architectures

Data platform engineering

- Unified data platform creation
- Data-as-a-Service, Analytics-as-a-Service
- Massive-scale data processing and analytics

Generative AI & ML

- GenAI & ML platforms solution architecture
- Model creation and scaling
- Cloud AI services
- MLOps and AIOps

DevOps

- Modern data platform management/monitoring/support
- DORA Metrics & DevSecOps
- Containerization & GitOps
- Data governance and management

Cloud cost engineering

- Cloud cost management & optimizer
- Cloud cost bottleneck identification
- Cloud cost forecasting

Our solutions and accelerators

LeapLogic-Cloud Migration Accelerator

Automated, disruption-free migration of legacy workloads to Databricks Lakehouse with 100% business logic preservation.

Cloud Cost Optimizer

Maximize your data estate ROI by shifting to a “cloud-smart” strategy for controlling rising cloud costs, improving spend visibility, and managing technical debt.

Impetus Unity Catalog Migration Accelerator

Industry’s first and only solution to concurrently upgrade workspaces and objects 4x faster to Databricks Unity Catalog with zero business disruption

Data Platform Accelerator

Accelerate unified data platform creation with rapid data lake deployment, unified data access, and intelligent storage tiering.

Creating an impact for leading enterprises across the globe

Powering unprecedented business outcomes for customers working with Databricks

Fortune 500 payroll, HR, and tax services firm	Real-time monitoring and analytics	Increased revenue and growth by 25% with data warehouse modernization ----- Improved customer service and operations cost reduction by 30%
Innovative sustainable energy provider	Faster modernization	60% reduction in modernization time with automation
Global digital marketing company	Data platform creation	15% increased revenue by introducing new revenue streams ----- ~6x improved legacy report generation performance
Leading provider for B2B data and insights	Performance enhancement	Significant manual effort reduction with auto-conversion of models ----- 10x performance improvement of Test Data Driven based implementation
