

The Intelligent Enterprise → Delivered

Data & GenAI at Scale

Our cloud, data, and AI services portfolio

Data platform engineering

- Accelerated data lake and warehouse creation
- Ingestion, ETL, and ELT setup
- Massive-scale data processing and analytics
- Security and governance

App development and modernization

- Cloud migration and maturity assessment
- Accelerators and technology evaluation
- Microservices, containerization
- Native and cross-platform mobile app development
- Lift and shift, re-platform, re-architect
- UI/UX design and development

Architecture consulting

- Cloud adoption strategies and enablement
- Technology evaluation and benchmarking
- Scalable elastic architecture design
- Architecture audit
- Hybrid and multi-cloud architecture design

Cloud cost engineering

- Cloud cost management and optimizer
- Cloud cost bottleneck identification
- Cloud cost forecasting

AI/ML

- ML platforms
- Creating and scaling models
- Automating ML lifecycle
- MLOps
- Generative AI

DevOps

- Management/monitoring/support
- AIOps and automation
- Data quality metering
- Data governance and management

Navigate the GenAI Frontier with Impetus

What we do

- **Innovate** with Enterprise AI Services
- **Unify & optimize** with Data Engineering Services
- **Migrate & modernize** with Cloud Engineering Services

Our solutions & accelerators

LeapLogic

Automate end-to-end transformation of data warehouses, ETL, Hadoop, BI, Mainframe, and analytics workloads to cloud with zero business disruption.

DevOps 360

Mitigate risk with AI-powered DevOps for enhanced productivity, resilience, and maturity with unified views and predictive issue tracking.

Data Platform Accelerator

Speed up the creation of a unified data platform, quickly fueling diverse business use cases and overseeing its entire lifecycle.

Impetus Unity Catalog Migration Accelerator

Industry's first and only solution to concurrently upgrade workspaces and objects 4x faster to Databricks Unity Catalog with zero business disruption.

Transforming business outcomes with strategic partnerships

Industry's first building block approach to rapidly deliver enterprise-class GenAI solutions
